

15. a) Write notes on character streams and byte classes in Java.

b) Discuss briefly about Java I/O classes.

www.osmaniaonline.com

(b) Find the Norton equivalent of the circuit shown in the figure below :—

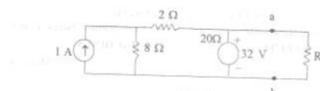

Fig. 2

12. (a) Deduce an expression for power in a 3-phase balanced circuit in terms of line voltage and line current. 5
(b) Derive the expressions for energy stored in inductance and capacitance. 5
13. (a) Explain the principle of operation of a transformer on no-load. 5
(b) A transformer on no-load takes 4.5 A at a power factor of 0.25 lagging when connected to a 230 V, 50 Hz supply. The number of turns of the primary winding is 250. Calculate
(a) the magnetising current,
(b) the core loss, and
(c) maximum value of flux in the core. 5
14. (a) Derive the emf equation of a dc generator. 5
(b) Explain the working principle of a dc motor. 5
15. (a) Explain the production of a rotating magnetic field with a 3-phase supply and 3-phase winding. 6
(b) Derive the torque equation of an induction motor. 4
16. (a) Explain the principle of operation of a stepper motor. 5
(b) Explain the principle of operation of a split phase capacitor start-capacitor run motor. 5
17. Write short notes on any THREE of the following :— 10
(a) Dot convention

FACULTY OF ENGINEERING
B.E. 2/4 (CSE) II Sem. (Suppl.) Examination, January 2012
ELECTRICAL CIRCUITS AND MACHINES

Time: 3 Hours

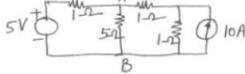

[Max. Marks: 75]

Note : Answer all questions from Part A.
Answer any five questions from Part B.

- PART – A (25 Marks)
- What is rms value of an alternating current ? 2
 - Explain dot convention in inductive circuits. 3
 - What do you mean by three phase balanced load ? 2
 - What do you mean by regulation of a transformer ? 3
 - Draw the characteristics of shunt motors. 3
 - Give the applications of dc motors. 2
 - Give various methods of speed control of induction motors. 2
 - Draw the speed torque characteristics of induction motor. 3
 - What are the basic features of split-phase motors ? 3
 - How are single phase motors made self starting ? 2

PART – B (5x10=50 Marks)

- Find using Thevins theorem, the current in the 5Ω resistor connected across AB in the network shown in figure.

- A balanced load of $(8+j6)\Omega$ per phase is connected to a 3-phase, 230V, 50Hz supply. Find the line current, power factor, real power, reactive power and apparent power.

www.osmaniaonline.com

Code No.: 5240

- a) Explain the principle of operation of a dc motor. 6
b) A 240V DC shunt motor takes an input of 23kW. The armature and field resistances are 0.2Ω and 125Ω respectively. Neglecting stray and friction losses, determine the efficiency. 4
- Describe the construction and explain the principle of operation of a 3- ϕ induction motor. 6
- Explain the principle and operation of a brush less DC motor. 6
- Explain open circuit and short circuit tests on a transformer and also explain how can you find efficiency and regulation from these tests. 6
- Write a short notes on the following :—
 - Energy stored in inductance. 3
 - Regulation of transformer. 3
 - Split phase motor. 4

<http://www.osmaniaonline.com>

www.osmaniaonline.com

Code No. : 5240/O

PART – B

(50 Marks)

11. a) An alternating voltage is given by $v = 141.4 \sin 314 t$ find
 i) frequency (ii) rms value (iii) average value (iv) instantaneous value. 4
 b) Determine the real and reactive power consumed by the circuit given below. 6

13. Describe the construction and working principle of a dc machine and explain how emf is produced in a generator. 10
 14. a) Explain the production of rotating magnetic field. 5
 b) Explain any one method of speed control of induction motor. 5
 15. Explain the operation of capacitor start capacitor run single phase induction motor. 10
 16. A 4 kVA, 400/200 V, 50 Hz, single phase transformer has the following test data.
 OC test : 200 V, 2A, 90 W.
 SC test : 20 V, 10A, 100 W.
 Find the equivalent circuit referred to high voltage side. 10
 17. Write a short notes on the following:
 a) Autotransformer 3
 b) Energy stored in capacitor 3
 c) Application of DC motors. 4

Note : Answer all questions from Part A. Answer any five questions from Part B.

PART – A

(25 Marks)

1. Derive the expression for r.m.s. value of a sine wave. 3
 2. Define reactive power. 2
 3. Calculate the power consumed by the 3- ϕ circuit given below. 3
 4. Define voltage regulation of a transformer. 2
 5. Give the applications of series and compound motors. 3
 6. List out the losses in a D.C. motor. 2

7. What are the different types of starters used for induction motors ?	2
8. Why is it not possible to run an induction motor on synchronous speed ?	3
9. How can the direction of rotation of a capacitor start motor be reversed ?	2
10. Where and why is a centrifugal switch used in a split phase motor ?	3

OPERATING SYSTEM

Time : 3 Hours

[Max. Marks : 75]

**Answer all questions of Part A.
Answer any five questions from Part B.****Part A – [Marks : 25]****VASAVI LIBRARY**

1. What can be the various states of a process ? 2
2. What can be the different parameters to define a multilevel feedback queue scheduler? 3
3. Under what circumstances do page faults occur? 2
4. What is a Free – space list? What are the different approaches to implement it. 3
5. What is a Semaphore? Where can it be used? 2
6. What is a Resource – Allocation Graph? Where can it be used? 3
7. With regard to Disk scheduling, define seek time, rotational latency. 2
8. How does DMA increase system concurrency? 2
9. What are the aims of the central conflict resolution mechanism provided by LINUX system? 3
10. What are the design principles of the WindowsXP system? 3

Part B – [Marks : 5 × 10 = 50]

11. (a) Describe the actions taken by a Kernel to switch context between processes. 5
(b) Explain the criteria for comparing CPU scheduling algorithms. 5
12. (a) Explain the "Segmentation with paging" scheme of memory management. 5
(b) What are the advantages and disadvantages of contiguous, linked and indexed allocation schemes of disk space. 5
13. (a) Give an algorithm to solve the readers – writers problem using semaphores. 6
(b) What are various schemes for recovery from deadlocks ? Explain. 4
